

IAD120 used to monitor an existing PBX / ACD

Notes:

- 1) Application running on the Intel PC creates recordings of conversations, date / timestamp used for the filename(s).
- 2) The IAD120 will sum both sides of the conversation in DSP, prior to recording.
- 3) Recordings can be triggered by specified 800 number in DNIS, DTMF, or external trigger.
- 4) Solution is completely Non-Intrusive.
